

Applicant respectfully request that the present application be amended as follows.

IN THE CLAIMS

Please amend claims 1, 3, and 9 by rewriting same to read as follows.

51
--1. (Three Times Amended) A network system formed by connecting a selected one of a plurality of terminal devices and a network server via a known communication system, wherein

each of said plurality of terminal devices comprises:
means for retrieving information from a removable memory storing user specific information, and
means for transmitting said user specific information and information of said selected one of said plurality of terminal devices used by a user as specific information when said memory means is loaded; and

said network server comprises:
means for receiving said specific information transmitted by said selected one of said plurality of terminal devices,

means for registering said specific information whenever obtaining a session with said network server, and

sub o 7
means for specifying said selected one of said plurality of terminal devices being used by said user by memorizing said specific information.

sub o 7
--3. (Three Times Amended) The network system according to claim 1, wherein said means for registering erases said registered specific information when said memory means is extracted from said terminal device.

sub o 7
--9. (Amended) The network system according to claim 1, wherein said network server further comprises means for sending a notification to said selected one of said plurality of terminal devices registered by said means for registering.--
